Coleman Miners Union Holds Protest Demonstrations Wed.

Workers Who Stand Aside Strongly Denounced by Andrew Dow, Local President—States Workers are Fighting for Decent Scale of Living.

In sympathy with the mine workers at Estevan, protest demonstrations were held yesterday in Pass town. Speakers at Coleman were Rock Sudworth, Archie Fraser, Andrew Dow and M. Miller. George Gaseoff was chairman of the meeting, held opposite the post office.

The causes leading up to the Estevan riot were outlined by Comrades Gaseoff and Sudworth, while Sudworth termed Senator Robertson as the greatest strike-breaker known to Canadian Labor. He referred to the proposed laying off of single men at the mines here, stating that this had been put into effect, there would have been an opportunity whereby the wages of married men would be forced down. Continually there were efforts being made to force down the standard of living and workers found it necessary to unite to prevent this. Not only the workers but their wives and children have to suffer for want of clothing and food.

Archie Fraser, in referring to the Estevan troubles, defended Sloan's action in organizing the Estevan miners, who were working under conditions unfit for a dog. One of the highest paid miners in the field stated his top wages were \$2.50 a day. As to Sloan leaving the strike area he was justified in doing so to avoid arrest, for it was the aim of the police to jail the leaders of the movement in order to wreck it.

"The workers build everything and own nothing," said Fraser. "They have to live in dungeons while those who do not work but take the profits of labor, live in luxury and fine homes. Some looked on the efforts of the workers as humorous, and stood aloof with an air of amusement; but they would find to their cost it was very serious, especially if they were reduced to acute want as so many are under existing conditions. Revolution does not mean slaughter, but it does mean a change in the capitalist system, and unless there is a change the workers are doomed to destruction. Workers must organize, and children must be provided for. At present there are supplies sufficient to feed three worlds, yet there is want and misery on every hand."

Andrew Dow, local president, stated it was his second appearance as a public speaker. Many of their capable leaders had been cast into jail, but the campaign must be carried on. In Estevan their comrades asked for bread, but were met with bullets. We must have police to maintain order over, but it is they were the hirelings of the capitalist system. The miners clamored for improved conditions in the Estevan field, and were ignored. The mine operators asked for protection to enable them to work with scab labor, and mounted police and machine guns were sent in. The miners received no help from the government; the operators did. Joe Flaville, the millionaire profiteer who made money by supplying salt pork to Canadian soldiers, advised the workers to take wage cuts and so help solve economic problems.

Referring to the Passburg incident, where relief workers struck for something better than 30c an hour, he asked if all workers in the Alberta government employ, including Premier Brownlee, would

be willing to work for 30c an hour and so help to relieve economic problems. These were things the workers were asked to submit to without protest.

The Communist party has endeavored by political action to place the wrongs of the people before the public. Estevan was a glaring example of oppression. Bennett and the police cannot stop the workers from carrying on their program for improved conditions as applying to labor. Many men who had invested money in life insurance policies, including himself, were unable to meet their premiums, while companies invested their money in enterprises which would make their profits from starvation wages. The workers party is the only party which would fight for the rights of those who had to toil.

Comrade Miller was the last speaker, and he read a resolution which has already appeared in printed form and given local distribution. On conclusion of the meeting a parade was held around the business area, and on its finish at the post-office, Andrew Dow called attention to those who instead of joining in the protest and marching behind the black flag as a last mark of respect for those strikers who were shot in Estevan, stood aside. He denounced them in scathing terms, and said that he had no use for men of that type.

During the meeting a light wagon which the speakers were using was removed. An employee of Lecky's meat market came and picked up the shafts whilst Rock Sudworth was speaking. He dismounted and continued his address, but later Andrew Dow characterized it as an insult to the workers, and said that it would be remembered. The meeting passed off in an orderly manner, and no questions were asked, but close attention was given to the addresses.

Reasons for Demonstration

In sympathy with the Estevan strikers, the union officials in the Crow's Nest Pass held demonstrations on Wednesday, terming it a protest strike.

The leaflets issued contained the following:

Demonstrate and Strike for:
Withdrawal of all State Forces from Estevan.
Liberation of all arrested miners and union organizers.
Full retribution by Provincial Government to dependents of dead and wounded miners.
Severe condemnation of Senator Gideon Robertson as official Government Apologist.
Right of miners to build Union of their own choosing.
Demonstrations were held as follows:

Coleman at 10 a. m., Blairmore at 2 p. m., Bellevue and Hillcrest, at Bellevue, at 5 p. m.

On Tuesday night both mines here signalled "No work," but the union placed pickets to the approaches to both mines on Wednesday morning. The only men working were officials. The Green hill mine at Blairmore is not working this week. It being the rule to work alternate weeks during the slack period.

The attendance at the schools was normal. Notices posted down town on Tuesday urged miners to keep their children from school on Wednesday in support of the Estevan strike protest, but apparently it was not heeded sufficiently to not on.

St. Alban's Social Evening

About 50 people attended the whist drive and concert held in the hall on Monday evening. Those taking part in the concert were Mr. Dunn, of Michel, with Mr. Bolstridge as accompanist; Freda Antrobus, who sang "The Birdie's Ball," playing her own accompaniment, and playing as a piano solo "Trot d'Avallier"; Mrs. A. E. Larke, soprano solo; Mrs. T. Blower, soprano solo; Mrs. J. T. Jones, of Blairmore, violin solos, "In a Gondola," (Mischa Elman) and D'Ambrosia's "Serenade"; the piano accompaniments being played by Miss Irene Chappell. These various numbers were highly appreciated.

An auction sale of fruit and vegetables was held, the proceeds being for church funds. The goods were donations for the harvest festival decorations of the church. Harold Turner wielded the hammer as auctioneer.

The sweepstake on the world's series was conducted by Col. R. F. Barnes, with Frank G. Creagan as clerk. The list of those drawing tickets is published elsewhere.

The evening concluded with a whist drive, the winners being Mrs. Wilson, ladies first; Mrs. Ireland and Mrs. Halliwell tying for second, Mrs. Ireland winning the cut; Mr. Turner the gent's first prize, and Mr. Cousins, gent's second.

The ladies served refreshments at the close. The Rev. A. S. Partington acted as chairman, and extended thanks to those who had contributed to the evening's program.

United Church Thanksgiving Services on Sunday Next

Special services will be held on Sunday, Oct. 11 at 11 a. m. and 7 p. m. The Sacrament of the Lord's Supper at the morning service. In the evening a thanksgiving message will be preached and the choir will be assisted by stringed instruments under the leadership of Mr. Harris. The young men's quartette will also sing.

Make it a day of thanksgiving and gladness by your attendance and hearty support.

It is important to remember that next Sunday and thereafter the Sunday school will assemble at 12 15, at the conclusion of the morning service.

Antidote for Communism

(By Bruce Patton in The Albertan)
The president-general of the D. A. R. relieved her mind the other day of the statement, that something has got to be done to save children from Communism. The Communistic "Young Pioneers" movement, she said, is understood to have enrolled over a million children; some sort of counter-offensive must be started or red radicalism will do us all kinds of dirt.

It is perfectly true that the Young Pioneers movement is hardly a beneficent one. It is likewise true that the lady's request for added support for other organizations for the children is quite proper. But if Communism is really endangering the nation, the menace will not be met in that way.

Broadly speaking, the prevalence of Communism in any country depends on the extent to which the average citizen feels that he is getting a square deal. There is no antidote for Communism equal to a well-paid job. If the ordinary man is being treated fairly, no one need worry about Communism; if he isn't, spooning out propaganda to the children won't help much.

Fire Losses in East Coleman

Several Buildings Destroyed Early Friday Morning—Sherratt Heaviest Loser

Herb Sherratt was the heaviest loser in a fire which destroyed several buildings in East Coleman early on Friday morning. Starting in Tom Holt's barn, a strong west wind quickly ignited Leon Dimado's sheds, then W. Holy's stable and coal shed ignited, M. Slier but's house and sheds were destroyed, while Herb Sherratt's house, garage and stable were completely destroyed, with only a few things saved. His loss is partly covered by insurance. A road between Sherratt's and buildings on the east side prevented further damage, though other buildings were scorched. The fire commenced about 1 a. m.

There is no fire protection in that district, consequently with a high wind there is very little chance of saving anything in the path of the flames.

It is outside of the incorporated area of the town and invariably a fire there consumes other buildings than which it originates in. Insurance companies refuse to make arrangements with the town fire brigade, and on occasions when service has been rendered, companies would not pay the firemen, with the result that the council decided that they must bear the loss of claims.

It is unfortunate for the people living there, as most of them are in humble circumstances, and a fire loss, no matter how small, means the wiping out of savings which have taken a long time to accumulate.

Bright Service at St. Alban's

A bright, inspiring service marked the harvest festival at St. Alban's church on Sunday evening. The sermon was delivered by the Rev. A. G. McMorine, of St. Paul's church, Michel, whose message on the significance of the harvest commonly associated in the minds of men, and the spiritual harvest, whereby all have an opportunity to work in God's vineyard, made a strong appeal to the hearts of the congregation.

The anthem, "O Lord, how manifold are Thy Works," added to the inspiration of the service. Mrs. Clifford was the organist. The church was filled, and a very good response was made to the harvest thanksgiving appeal.

The Rev. A. S. Partington, rector, expressed his thanks to the ladies for decorating the church, and for the gifts of fruit, flowers, vegetables, etc. Beautiful chrysanthemums on the altar were donated by the Ladies Guild.

The church officers are appreciative of the response made for the harvest thanksgiving, and thank all who donated at the services or through the special envelopes sent out with the appeal letter, as it is of great assistance in maintaining the payments due before the end of the year to the Synod office.

Visits Western Properties

J. Charbonnier, president of the Bighorn and Saunders Creek Collieries and vice president of the West Canadian Collieries Limited, recently made a stop-over in Winnipeg on his way homeward to Nice, France, after an inspection of mines and offices in Western Canada.

Announcements

The L. O. L. will hold a whist drive and dance on Saturday, Oct. 10, at 8 p. m., in the Oddfellows hall. Admission 50c. Everybody welcome. Turkeys and chickens will be given as prizes.

On Friday and Saturday we will have with us Mr. Palmer, of Heath's Ladies Wear, Calgary, with a large and attractive display of the very latest models in coats and dresses. Dresses in Tweeds, Printed Silks, etc., from \$3.50 up. This is your golden opportunity to buy a smart dress at a very moderate price. We cordially invite your inspection on Oct. 9 and 10—F. M. Thompson Co., Blairmore.

The Women's Guild of St. Alban's Church will hold their annual Bazaar and home cooking in the parish hall on Saturday, Oct. 24th, from 3 to 6 p. m.

Will Organize Girl-Guides

A meeting of parents and teen age girls of St. Alban's parish will be held in the parish hall on Saturday at 8 p. m. to organize a troop of girl guides. Miss Florence Lerry and Rev. A. G. McMorine of Michel will assist in the organization. A cordial invitation is extended to all interested to be present.

Frank Dance Cancelled

The Red Cross whist drive and dance advertised last week has been cancelled, as Mrs. Sherring has been called away for a few weeks.

ST. ALBAN'S CHURCH

Next Sunday, the 19th after Trinity, and the eve of the national thanksgiving day, the service will be: 11 a. m., holy communion and sermon, 2.30 p. m., Sunday school.

Over a million packages sold each week

CASTORIA

'Fresh from the gardens'

A National Disgrace

With the advent of the first few chilly nights this Fall, the newspapers once again begin the gruesome task of printing reports of fires with their records of tragic loss of life, terrible sufferings and enormous loss of valuable property, caused, in the vast majority of cases, through downright carelessness and disregard of the most obvious dictates of common sense. In the first week following a drop in temperature the papers reported case after case of explosion, fire, and death following the improper use of kerosene in starting fires in stoves. Yet people will persist in this highly dangerous practice.

Despite all the efforts of Government and municipal departments and officials, reinforced by those of insurance companies, the fire loss in Canada mounts steadily higher. Computed in dollars and cents the Canadian fire losses in 1930 totalled over \$46,000,000. This does not take into account the loss of 237 lives, nor the expenses entailed for doctors, nurses, hospitals for a much larger number of persons severely burned. It does not include the enormous expense to which every urban community is put in maintaining elaborate and costly fire-fighting equipment, nor the excessive insurance premiums which every owner of property is called upon to pay because the fire risk in Canada is so hazardous.

People today complain of depression, hard times and business losses, yet Canadians remain undisturbed over a condition, largely preventable, but which is levying a direct money toll upon them of millions of dollars a week. If because of hard times and consequent inability to pay rent or meet mortgage payments, an average of three families a day were thrown out of their homes, a vigorous protest against heedless landlords and mortgage companies would be heard throughout the land, yet, according to recent figures made public, an average of three families were made homeless by fire in Saskatchewan alone every day in 1930, and the figure is even higher for the first half of 1931.

The figures are positively startling. In this one Canadian Province, (Saskatchewan), between January 1, 1930, and July 31, 1931, no less than 1,679 dwellings, 579 stores, 610 barns, and hundreds of other buildings were destroyed by fire. And hardly a protest is heard!

And this terrible loss, which is being duplicated proportionately in all other Provinces,—and which is going on at a time when the demand is being made to reduce legitimate expenditures all along the line, lower wages, eliminate all waste and extravagance,—is largely preventable. This great loss, which, if saved, would more than provide for all necessary relief works throughout the Dominion, is the direct result of carelessness and reckless disregard of obviously dangerous conditions.

The work of education along lines of fire prevention must go on. It must be attempted on a national basis. It is gratifying to note that, in Saskatchewan at least, a well-organized campaign is being inaugurated among all school children, one designed to capture the imagination and assure the interest of all children.

But is fire prevention campaigns and propaganda sufficient in themselves? In the past they have not been. The question arises, therefore, whether the time has not come in Canada to have an official inquiry into every fire that takes place, ascertain the cause and fix the blame, and, coupled with this, to make it an offence under the law for any person to have a fire from other than natural causes beyond their control, such as lightning, and made liable to a fine and subject to the payment of damages for any resultant loss to other people's property?

If the tenant or owner of a house was liable to a fine if a fire occurs because of a faulty chimney, defective wiring, accumulated rubbish, or other preventable cause, and made to pay the costs of the fire department in extinguishing the blaze, and forced to make good any loss sustained by a neighbor because of his carelessness, then, possibly, a good many now very careless and thoughtless people would exercise more care.

And why, it may be asked, should the careless householder from a fire protection standpoint, be immune from the payment of penalties for his carelessness any more than the careless automobile driver, or industrialist, who neglects to provide safeguards for his workmen?

The fire loss in Canada is a national disgrace, as well as constituting a huge annual national loss we can ill afford to suffer. It is time something effective,—draconic if necessary,—be done to not merely remedy but remove this evil.

Canada in England

A Prince Among Merchants

Dominion Took Prominent Part At Animal Exhibition Held At Bristol

A prominent part taken by Canada in the animal exhibition at Bristol, England, held from September 2nd to 16th. A Canadian section was organized consisting of the Government stags and individual booths occupied by private Canadian firms, according to an announcement of the Department of Trade and Commerce. The background of the Government display is a large industrial map of Canada illustrating the points of production of many products exported to the United Kingdom.

Where Man Falls

There are fifty million food victims starving in China while the granaries of Canada and the United States are bursting with millions of bushels of wheat for which there is no market. The people will likely go on dying and the wheat will continue to bulge the bins in which it is stored. Such is the world's system of transportation and distribution in emergencies.

Could Not Check the Summer Complaint

A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes: "Last summer my youngest son was very bad with summer complaint, and everything he ate would vomit, and he got so thin I became very much worried. I could not get the doctor checked, so I went to the drugstore and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first few doses he noticed the discharges were being checked, and in was not long before he was well again."

Sanburning Used As Cure For Tuberculosis

Doctor Has Recently Introduced This Method In Vienna

Sanburning the inside of one's lungs to cure tuberculosis is a procedure introduced in Vienna by Dr. Alexander Cernach, inventor of ultra-violet rays.

Dr. Cernach recently developed a device for treating hay fever and other nasal irritations by the application of these rays to the inside of the nose. To use his still newer device for treating tuberculosis, spots in the lungs affected by the disease first are located exactly by a series of X-ray photographs. A skillful surgeon then introduced into each of these infected spots in turn a narrow, bent rod, passed in through the throat and having at its end a tiny quartz lamp supplied with electric current, through wires, inside the rod.

Once properly in place, this quartz lamp is lit electrically for a few seconds or minutes. A powerful beam of the ultra-violet rays, like those of sunlight, thus is produced inside the diseased part of the lung. The germs of tuberculosis are killed easily by these rays, which is the reason sunlight is so good a disinfectant against them.

Many of the living germs in an infected lung thus are killed. Dr. Cernach believes, by the internal ray as provided by his instrument. Even if some of the germs are protected by the lung tissue enough are killed so that the natural germ-fighting force of the body can dispose of the rest.

Treatment by the instrument is now under comprehensive trial in Vienna, especially for the kind of tuberculosis sometimes called "helping consumption," which progresses rapidly and often falls to yield to ordinary methods of treatment.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way to do this is by renewing the color of faded or out-of-style dresses, coats, stockings, and undergarments. By dyeing, or tinting, I always use Diamond Dyes. They are the most economical and safe because they never fail to produce results that make you proud. Why, things look better than new. I've dyed with Diamond Dyes. They never spot, streak, or run. They go on smoothly and evenly, and wash out. Even a ten year old child. Another thing, Diamond Dyes never take the life out of clothes. They're the best, some of you. They deserve to be called 'the world's finest dyes'."

S.B.G., Quebec.

The Safest Conveyance

Toronto Proves Accidents To Street Cars Are Rare

Although seventy-one were injured in a street car wreck at Windsor, Ontario, the fact remains that a street car is just about the safest place to be while on a public thoroughfare. Since taking over the Toronto railway system in 1921, the Toronto Tramway Co. has collected, up to the end of 1930, more than 3,775,000,000 fares on its city system, and the number, together with fares on the coaches, etc., is now in excess of 2,000,000,000. Yet not one passenger has been killed while riding on a street car or bus. It is a fine record.

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child, a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little gentle rubbing and it is absorbed by the tissues, making the skin truly rose-lust in texture.

Frozen Strawberries

New Process For Packing Adopted By B.C. Growers

Frozen strawberries and other small fruit will be shipped from Vancouver Island in steadily increasing volume, following the adoption of a new process for packing, in the opinion of Captain R. L. Evans, manager of the Saanich Fruit Growers Association, who expects that the plan will absorb a large part of this year's surplus. A company has been formed with a capital of \$75,000, and with the growers as chief stockholders, which expects to handle at least 30 tons of strawberries and loganberries this season.

And Now

Visiting Nurse—"And do you children use a toothbrush regularly?" Fond Parent—"Do they, mum?" First thing when they get up in the morning, it's a race to see which one can get to the toothbrush first!"

Masks of living faces can now be made by a method which preserves the human features, exactly as they are in life.

W. N. U. 1910

IN BED WITH BACKACHE

"Two years ago I suffered with severe pains in the small of my back, and could with difficulty hold myself upright. At times I had to go to bed at a time. I went to and from hospital for 8 months, and they certainly did me good, but they could not keep giving me medicine, but that I needed complete rest for 6 months, away from the children. I could not bring myself to be parted from the children, so I did not go to hospital any more. I started using Kruschen Salts and have had no trouble with my back since."—Mrs. W. Kruschen contains vital salts that go right down to the root cause of backache. Soon after you start on Kruschen's salt-pellets, the twinges become less and less frequent, until finally you hardly know what an ache or pain is. Then, if you're wise, you'll prevent the possibility of a relapse by continuing the tiny, tasteless pinch of Kruschen every morning.

Was Dangerous Trip

Wilkins Returned Because He Considered Conditions Too Risky

One day after Mr. George Hubert Wilkins and his Arctic exploring submarine "Nautilus" had for six days ceased communication with anxious radio stations, his pretty wife exclaimed in London: "I have a hunch tonight will bring good news."

News which came was that the "Nautilus" lay floating amid ice debris north of Spitzbergen and about 400 miles from the North Pole. Ice had broken off the submarine's diving fin. Nonetheless, Sir Hubert had water-filled her diving chambers, and nosed under vast cakes of ice. When the first scraped under, the hollow steel hull, Wilkins reported, "was a veritable drum or sound box with the faintest scratch of the ice sounding like the ripping of giant strips of calico. Heavy bumps set up tremors like the continuous shocks of earthquakes."

The crew quickly recovered from the shock, looked out the portholes. They saw steel-like fans of ice, moving stealthily through the water, which changes in colour . . . throughout the entire range of blues." They saw prawn-like and cockroach-shaped creatures, sea urchins, medusae jelly fish. Through compression chambers they took samples of water and bottom sludge.

They rammed their ice-borer, which was to give them escape if they were gripped under ice, against the ice. It clicked and rattled. Ice cracked the runners into the "Nautilus," which were to enable her to slide against the underside of ice fields. She sprang two leaks, became miserably afloat. The pioneer edges became saw-toothed and bent, grinding against small ice. But at last the "Nautilus" emerged from the ice-mashed Arctic and Sir Hubert radioed the world that he was all right.

William Randolph Hearst, for whose publication and news service Sir Hubert has been reporting the submarine excursion, wireless him a plea: "I must urgently beg of you to return promptly to safety and to defer any further adventure until another and more favourable time, with a better boat."

Sir Hubert replied that it had really become too risky to venture further north. Regrettably he was returning to Spitzbergen.

Norwegian coastal planes and ships en route for "Nautilus" rescue, and voiced their vexation at the expense which troubled explorers cause other people. It was suggested that henceforth all Polar expeditions be required to post enough money to pay for rescue expeditions.

Up To The People

All the Government measures in the world cannot create prosperity, says the London Daily Express. They can break down barriers. They can clear the channels. But in the end the manufacturers, the worker, the wholesaler and the retailer must carry the responsibility on their shoulders. Leave government to the Government. They are quite adequate to the present emergency. As for the rest of us, let us get on with our jobs—and begin today.

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passages tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily besetting cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

The Three Essentials

In order to obtain the greatest possible returns from the pullet flock three essential things are: Good healthy, vigorous stock and proper winter quarters. It is during the winter months that the greater profits are made because of the higher price of eggs.

The Changing Conditions

Now Passing Through a Phase the World Has Never Before Experienced

The methods and habits that are now rapidly spreading over the world are not those produced by the industrialism of the nineteenth century, but those arising directly out of the advances made in a single generation, contemporary civilization being barely twenty years old. The world of today is what it is, not because of the industry and invention of which steam and the railway were the governing forces, but because of electricity and motor transport, the airplane, the cinema, the radio. These influences came into social operation with extraordinary swiftness, and their conquest of the whole world will now be a matter, relatively, of a very short period. The life of all mankind becomes directly affected. The relations of governments and peoples, money, manufactures, and crops, standards of living, the worker's food and leisure, his children's education and his wife's domestic day—all are going through a rapid and thorough transformation the like of which has never been known on earth.—New Statesman and Nation.

Save On Pensions

Decision Of Federal Government Will Assist Alberta

Savings at the rate of \$250,000 a year will be made to the Alberta provincial treasury by the decision of the Dominion Government to take over 75 per cent. of the old age pensions payments, advice of which has just been received from Ottawa.

The new arrangement will date from July last. It will involve a revision of the agreement between the provinces and Dominion, but this, it is stated by Premier Brownlee, will be only a formality and will be attended to at once.

The division of the responsibility for old age pensions, as between the two governments, has heretofore been on a fifty-fifty basis, Alberta's total budget for the purpose being \$1,000,000. On this a saving of 25 per cent. will now be made to the province.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

Giant Airship Tested

The U.S.S. Akron Carried 113 Passengers On Trial Trip

The U.S.S. Akron has been taken upon her first flight and came down safely at Akron, Ohio, three hours and 47 minutes later.

The flight was the first test for the world's largest dirigible, built here for the United States navy, and the Akron went through it in a manner highly pleasing to navy officials.

The ship carried 113 men, the most ever carried in the air in the United States and believed by navy officials to be the largest passenger list of any airship in the world.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—it is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

Castoria
CHILDREN CRY FOR IT

Railway Accidents

One Hundred and Ninety-One Mishaps During the Month Of June, Report States

There were 191 railway accidents during the month of June, a report issued by the Board of Railway Commissioners for Canada shows. Twenty-five persons were killed and 183 injured in these accidents, besides which there were 11 persons killed and 31 injured in 24 railway accidents at highway crossings.

Ontario led with 16 crossing accidents; Quebec had five, New Brunswick two, Nova Scotia one, and the rest of the provinces none, during the month. Of the 24 accidents, six occurred at protected and 18 at unprotected crossings. Twenty occurred during the day and four at night.

A Powerful Locomotive

The most powerful locomotive of its kind in cylinder type engine, left Smith Falls recently for Montreal, drawing a freight train of 96 cars of grain, a dynamometer and a van weighing 8,123 tons, the whole train being a mile in length. It arrived at its destination the same day when the grain was unloaded for shipment overseas.

Thirty-six tons of strawberries were carried by aeroplane from the Netherlands to London in May.

S.S. Farnworth Reaches London With Grain Cargo From Port Of Churchill

London, Eng.—With every light gleam and her whistles blowing hoarsely, the steamer "Farnworth," Sunday night, October 4, wrote maritime history as she slid slowly into her berth at Victoria dock, loaded with Canadian grain.

Other vessels, thousands of them, had carried similar cargoes. But the "Farnworth" had loaded at Churchill, Manitoba, Canada's newest ocean port. She had made a fast, safe trip through what for years had been thought to be the "frozen north." She had safely negotiated the Hudson Straits and the North Atlantic. She had brought the grain growing areas of the prairies 1,000 miles closer to the British market.

Slipping up the broad Thames ahead of time, the "Farnworth" beat the official welcome by many hours. As fussy little tugs pulled her here and there, only sailors on vessels already docked realized that before them was opening a new chapter of communication between Canada and the Mother Country. They cheered heartily as the "Farnworth's" lines sailed ashore; they cheered even after the fore and aft and breast lines had been tied to the snubbing post. The crew of the pioneering ship were eagerly questioned as to the new port of Churchill, far up on Hudson's Bay.

While the celebration Sunday, was a minor one, Monday the official welcoming ceremonies are scheduled. Malcolm MacDonald, under-secretary for the Dominions and son of Britain's Prime Minister, Ramsay MacDonald, will represent the British Government. Lieut.-Col. G. H. Vanier, representing Hon. G. Howard Ferguson, Canadian High Commissioner, who is at present in Canada, will also be on hand. A large party of officials of the port of London are to officially welcome the ship to the great harbor.

It is just 16 days since the "Farnworth's" line slipped into the waters of Hudson Bay. The newly constructed government elevator had filled her holds with 277,000 bushels of grain in record time. The entire loading took place without a hitch. Five days later, the "Farnworth," a sister ship sailed with 268,000 bushels for an unnamed port.

Before the "Farnworth" sailed from Churchill her cargo had been sold. While the shipments were only considered experiments—tests of the new route which had been laid out—the English firm of Spillers, Limited, had agreed to purchase the entire cargo, which comprised 2 1/2 northern wheat, for delivery in London.

The success of the first overseas trip ever attempted from the new Canadian port is expected materially to assist in obtaining lower insurance rates for vessels which hope to ply out of Churchill. The insurance rates are now very heavy, but are expected gradually to become lower as successful voyages are made.

Domestic air mail rates for first class mail in Cuba have been reduced from 10 to five cents an ounce.

Unemployed Clash With Authorities On Glasgow Green

London, Eng.—In Glasgow, Scotland; Salford, Lancashire, and Bristol and London, England, demonstrations were attempted by crowds of unemployed. In all cases mounted police armed with batons proved sufficient to handle the disturbances, although the mob on Glasgow Green numbered fully 50,000. A number of the rioters and some policemen were slightly injured, and numerous arrests were effected.

The most important disturbance was that at Glasgow, which finally ended in the arrest of John McGovern, turbulent Labour member of the House of Commons. Scotland's principal industrial city was the scene of various demonstrations during the day. Early thousands of men were paraded, but despite constant singing and shouting, and traffic holdups, order was maintained. The corporation received a deputation of 15 and afterwards agreed by a vote of 57 to 38 to submit the grievance to the public assistance committee.

A crowd of 50,000 jobless gathered on Glasgow Green was charged by mounted police. Several persons were injured. The demonstrators were led by John McGovern, who participated

Death Of Sir Thomas Lipton

Famous Yachtsman and Merchant Prince Passes in London

London, Eng.—Sir Thomas Lipton, fine old Irish sea dog and one of the world's greatest merchant princes, died, Friday, October 2, at the age of 81. The cause of his death was a heart attack which followed a severe chill he caught while motoring several days ago. For the last year his health has been a cause of recurrent anxiety.

Sir Thomas died peacefully in his sleep. Several old friends were at the bedside but no near relatives as he is the last of his family. He died without attaining the great objective of his life, on which he had spent huge sums from a fortune made primarily from tea—the winning of the America's cup. Instead he won the epitaph, "the world's best lover" and the affectionate admiration of millions on both sides of the Atlantic.

Ice Catches Trading Ship

Airplanes May Bring Out Passengers On Hudson's Bay Steamer

Vancouver, B.C.—Eleven passengers and the crew of the S.S. Bayview, Hudson's Bay trading ship, are faced with the possibility of spending the winter frozen in Arctic ice at Sea, shore Island, northwest of Point Barrow, according to advices here.

The ship was bound for Vancouver with the season's fur trade cargo when she was caught in the ice. Airplanes may be used to bring the passengers out if the ship cannot be moved until spring, but the crew will remain. There are plenty of provisions. Among the 11 passengers is Fred Ware, son of William Ware, manager of the trade division, and the captain is S. A. Cornwall.

"Nautilus" Will Be Sunk

United States Shipping Board Gives Permission To Wilkins

Washington, D.C.—Permission to sink the submarine "Nautilus" in the North Sea, off the coast of Norway, has been granted to Sir Hubert Wilkins, by the United States Shipping Board. The Board consented that Sir Hubert take the vessel that carried him to the Arctic for an under-ice expedition out to deep water, and scrap it, instead of returning to a north Atlantic port.

May Donate Day's Pay

Toronto, Ont.—Civil servants of Ontario will be asked to donate one day's pay monthly to an unemployment relief fund during the five months from November to March. It was decided at a meeting here of the Ontario Civil Servants' Association. Hon. George S. Henry, Premier, expressed great pleasure when informed of the step taken.

Sets New World Mark

British Flier Breaks Own Record Made In Schneider Race

London, Eng.—Flight Lieutenant G. H. Stainforth established a new world's aeroplane speed record of 408.5 miles an hour over a three-mile meter course at Calshot, it has been officially announced.

Lieutenant Stainforth broke his own record of 379.0 miles an hour, made in the Schneider trophy race on September 13. He flew a seaplane fitted with special engines.

The announcement was made following a prolonged examination and comparison of the judges' checks. The following speeds were finally given for the four successive laps: 415.2, 405.1; 409.5, and 408.4.

These gave an average speed of 408.5 miles an hour.

The racing seaplane flown by Lieutenant Stainforth was fitted with what is claimed to be the most powerful engine ever built and it was designed for this flight alone, achieving the amazing speed of 415.2 miles an hour on one of the four laps.

Viscount Byng Retires

Ends Three Year Term As Chief Of Scotland Yard Force

London, Eng.—"I am, as you know, sorry to leave," said Viscount Byng of Vimy, as he left Scotland Yard for the last time. His retirement as Chief Commissioner of the Metropolitan Police and head of Scotland Yard ended a three-year term in which he effected a wide reorganization of the great force, undertaken only two years after the end of his term as Governor-General of Canada.

"Age and health are the sole reasons which compel me to go," Lord Byng added. "I am responsible for neither of them. The police force, I can say truthfully, is the finest force in the world. It is keeping pace as no other with modern scientific developments in regard to wireless and every other form of advancement that can help it in counteracting the activities of the criminal."

"I leave the force with great feelings of affection."

Famous British Artist

Death Reported Of Sir William Orpen After Long Illness

London, Eng.—At the comparatively early age of 53 years Sir William Orpen, distinguished British artist, president of the International Society of Sculptors, Painters and Engravers for the past ten years, died Wednesday night, Sept. 30. He had been ill for a considerable period.

Sir William's most notable work was probably in the field of portraiture, and noted critics have commented that his decided bent to the satiric and summary method brings some of them close to caricature. A heated controversy was aroused over what was virtually his last painting, "Pain Sunday, A.D. 23," exhibited at the last meeting of the Royal Academy—a study of Christ on a donkey, going to Jerusalem.

Favourable For Gold Prospecting

Ottawa, Ont.—Geological conditions of an area several hundred square miles in extent in the Oxford Lake district of northeastern Manitoba appear favourable for future prospecting of gold, according to Dr. J. F. Wright, of the geological survey, Department of Mines, Ottawa, who has just completed a season's work in that area.

BRITISH SUBS GO TO CHINA

Above is a picture of the "Proteus," one of the four new British submarines in the "P" class, the latest thing in underwater fighting craft, which has left British waters to start open submarine warfare against flogging Chinese pirates who prey on foreign and Chinese ships in the Bias Bay area. She will join the "Poseidon," "Perseus" and "Pandora," in the scrap.

SUGGESTS PLAN

Hon. Peter Heenan, former Minister of Labor in the Canadian Liberal Government, proposes a five-million dollar insurance fund to protect railway workers from lay-offs such as are being experienced at present. He unfolded his plan when addressing a service club in Ottawa.

Postpone Grain Show

World's Grain Exhibition Will Be Held In 1933

Regina, Sask.—The World's Grain Exhibition and Conference is to be postponed for one year, and will be held in Regina in 1933.

Announcement to this effect was made by Hon. Robert Weir, Federal Minister of Agriculture and chairman of the national committee of the World's Grain Exhibition and Conference, after he had received resolutions from the council of the Regina Board of Trade, and the Board of Directors of the Regina Agricultural and Industrial Exhibition Association, urging the postponement for a year, rather than cancellation.

Mr. Weir said he was in accord with the terms of the resolutions, and favoured the postponement of the World's Grain Exhibition and Conference for one year.

"One of the biggest difficulties in reaching this decision was to determine the effect postponement or cancellation would have on the City of Regina, in view of the commitments that the city has already made."

Coal For Churchill

S.S. Farnworth Brought Cargo Of British Coal To Northern Port

Montreal, Que.—Churchill received her first consignment of British coal when the S.S. Farnworth arrived there September 10, to load the initial shipment of grain from Canada's new port on Hudson Bay, pointed out Thomas Hartling, Montreal ship agent, referring to the "bunker" coal put off before loading wharf. He said the amount was no more than 1,500 tons.

The movement indicated a possible trend for the future, as lower rates on eastward movement of grain could be obtained if it was possible to carry a cargo of coal westward for discharge at the new bay port, Mr. Hartling said.

Ontario's Liquor Bill

Toronto, Ont.—With another month of the fiscal year to come, the indications are that Ontario's spending on beer, wine and liquor for the present year will fall just under \$50,000,000, says the Toronto Star in an unofficial estimate.

Wheat Shipments For Present Crop Year Are Largest In History

Attends Quaker Meeting

Mahatma Gandhi Goes To Prayers Meeting and Maintains Silence

London, Eng.—Mahatma Gandhi, Hindu Nationalist leader, and Lord Sankey, Lord High Chancellor, who is presiding over the Indian Round Table Conference committee meetings, went to a Quaker prayer meeting and sat side by side for half an hour while nobody spoke a word. At the end of the period the assembly, still silent, arose from its seats and dispersed.

The Mahatma then went to a hotel to meet His Highness the Aga Khan, spiritual leader of the Moslem world, for a further attempt at an approach between Moslems and Hindus. Earlier in the day both Gandhi and the Aga Khan had separate conversations with Prime Minister Ramsay MacDonald.

Freight Train Derailed

Seventeen Cars Leave Track and Rattle Torn Up For Considerable Distance

Saskatoon, Sask.—One man was seriously injured, and others have been caught in the wreckage of a fast east-bound freight which derailed one mile west of Ainsworth, on the main line of the Canadian National Railways.

Louis Balogh, of Saskatoon, lies in a hospital here at Ainsworth. He is in a comatose condition with severe head and chest injuries.

Seventeen cars, some of them loaded with coal, left the track, ripping up rails and ties for nearly half a mile.

The box cars were badly smashed, and the right-of-way was piled high with the coal and other goods in the shipment.

"As You Were"

Return Of The Ever Popular Dumbells To Western Canada

Winnipeg, Man.—A brief glance at the theatrical situation in Canada shows the same condition that has prevailed for the last two or three years. There are a lot of shows on the books. Several whose dates were set for early in the season have cancelled, and the only attraction that is keeping to their original bookings and playing right across Canada is our own representative company, "The Dumbells," now on their thirteenth annual tour of the Dominion.

"The Dumbells" are booked for the west shortly, when they will present a new, and from all reports excellent, overseas review, called "As You Were." The military sounding title was chosen advisedly to convey the glad news that "The Dumbells" are once more an all-men organization—as they were in France, and for their first ten years in Canada.

Rosa Hamilton is back, sharing the three star honours with Al Plunkett and "Red" Newman. Other featured impersonators are, Glenn Allan, the clever dancer of a few seasons ago; De Roman, an internationally famous impersonator of colour bellies; and the burlesque beauty brigade. The Dumbells are also featuring a ten piece stage band under the direction of Captain M. W. Plunkett. The Dumbells are billed to play the Walker Theatre, Winnipeg, this week, then Capitol Theatre, Regina, Oct. 12, 13, 14, Capital Theatre, Saskatoon, Oct. 15, 16, 17, Empire Theatre, Edmonton, Oct. 19th, week, and Grand Theatre, Calgary, Oct. 26th, week.

Threats Of Unrest If Moslem Rights Are Not Protected

London, Eng.—A threat of unrest if the rights of the Moslems in India are not protected when India is accorded federation status was voiced by leading Indian Moslems to the members of the House of Commons and the House of Lords.

Maulana Shaikat Ali, who served nine years in prison for anti-British activities, predicted trouble if the Moslem demands are not met.

"But," he said, "if you want friends, here is the hand of an honest man."

Up to that point, the committee room in the House of Commons had been quiet as a church, but at his offer of peace the members cried "Hear! Hear!" and there was a great clapping of hands and stamping of feet.

Sir Mohammed Shaf, speaking for the Aga Khan, Moslem leader, ex-

pressed the belief that the future of India lies within the British Commonwealth of Nations.

"India's Moslems will co-operate," said he, "until and unless you bring it to them that the British Government no longer will recognize and protect their legitimate interests—until you are able to work to allow Mahatma Gandhi and the Aga Khan an opportunity to reach an agreement regarding the status of the Moslems under the projected federation."

Meanwhile the Hindu-Moslem communal dispute is holding up the progress of the round table delegates whose minorities committee adjourned for a further week to allow Mahatma Gandhi and the Aga Khan an opportunity to reach an agreement regarding the status of the Moslems under the projected federation.

Figures released by the Trade and Commerce Department showed Russian exports of wheat increased from 11.4 per cent. of the world movement to 30.4 per cent. which more than counter-balanced the drop in North American sales.

Praises Hospital Work

Hon. R. B. Bennett Addresses Large Gathering In Toronto

Toronto, Ont.—In words of highest encouragement and appreciation of the work of medical sciences for the preservation of the race and happiness, Rt. Hon. R. B. Bennett, Prime Minister, addressed the American Hospital Association here. The past 50 or 60 years, Premier Bennett declared, had witnessed greater advance in medical science than in all the preceding centuries.

"As I review the advances of mankind," the Prime Minister told his audience of medical practitioners gathered from Canada and the United States, "I find during the past 50 or 60 years more progress has been made against disease and illness than in all the centuries preceding that period."

"While we may find that frontiers divide us and customs duties are imposed," Premier Bennett added with a touch of humour, "there are no frontiers and no customs duties imposed against the united efforts of our friends to save health and our country for the good of suffering humanity."

B.C. Fruit For Orient

Vancouver, B.C.—With a view to popularizing British Columbia fruit in the Orient, a trial shipment of canned tomatoes, grown in the province, left on the S.S. Empress of Asia for Hong Kong and Shanghai, the other day, the same liner carrying, also, a cargo of canned lobsterberries for Hong Kong.

Employ a Thousand Men

Winnipeg, Man.—Approximately 1,000 single men and transients will be employed on the construction of the Manitoba section of the trans-Canada Highway. The work, which provides only for the eastern part of the road, has been approved by both Dominion and Provincial Governments.

ONE DOSE GERMAN REMEDY ENDS GAS

"I was sick and nervous with indigestion and stomach gas. One dose of Adlerika helped. I eat anything now and sleep good."—Henry Dodd.
You can't get rid of indigestion or gas by just doctoring the stomach. For gas stays in the UPPER bowel. Adlerika reaches both BOTH upper and lower bowel, washing out poisons which cause gas, nervousness and bad sleep. Get Adlerika today; by tomorrow you feel the wonderful effect of this German Doctor's remedy. H.C. McBurney, Druggist.

The Canadian Labor Party in Calgary passed a resolution urging on the Federal government to investigate the police action in resorting to the use of firearms in the Estevan strike riot. Reference was made to the fact that a disturbance of 50,000 people had been quelled recently in Glasgow without the use of firearms.

NOTES AND COMMENTS

Another example of lack of co-ordination in distribution....Creston fruit growers have tons of apples which because of marketing restrictions, or arrangements with wholesale purchasers, are left to rot. They would be willing to give them away if someone would bear the expense of gathering and transporting. What a glaring example of God's bountiful providence, and man's shameful waste.

'Tis not alone in apples that such a condition exists. It impresses one with the realization that most of the distress is of man's making, for nature provides plenty and man hasn't the brains to arrange for its distribution to those who need food. Or is it greed on the part of market manipulators which holds up the supply of the common necessities?

Life is just one thing after another. This is as it should be, otherwise we would stagnate. Following the exciting interest of the world's baseball series, citizens of the United States are speculating on the presidential nominations which will be made next June. Combined with the Prohibition campaign, the people in the land of the "brave and the free" will not lapse into inertia.

Letters to the Press allege that contractors on road work in Alberta are getting a profit from funds allocated to unemployment relief. This will incense public opinion against governmental laxity in permitting this, especially as the public has to pay. The profiteer is ever with us, giving Communists plenty of arguments to use against the capitalist system.

There is too much leaning on governments to remedy public ills. Individual effort efficiently organized is the main factor in solving problems concerning the public welfare. The city of Denver is organizing its people to alleviate unemployment. It has no Federal or State funds at its disposal. But it has leading citizens who will give time towards creating jobs. Their energy will prove more valuable than handouts, and will not only help the unemployed, but will show others who sit and wait that the job can be done.

Foreigners names loom largely among the strike victims and those arrested at Estevan, as in similar occurrences throughout the Dominion. Some English names loom prominently among those who incite them. Can it be wondered that, laboring under trying times, and being told that the ideal system is that of Communistic Russia, they are easily swayed by appeals to emotion? There is no propaganda carried on to combat pernicious and treasonable influence against the State, and the law is made to appear in their minds as the oppressor. Suppression will not effect a cure. It engenders open rebellion. Communism must be met as an issue and subjected to the same searching scrutiny as all other public issues. The more light thrown on Communism and its effects, the better opportunity there will be to show its weaknesses or its merits. It may be an unfavorable suggestion to the majority, but unpleasant facts must be dealt with as in other problems which affect domestic relations in a country.

The thrills of the world's baseball series were enjoyed by fans in Canada through the medium of the radio. It was quite easy to visualize the thousands watching the game, and to share to some extent plays which brought cheers in mass volume from the spectators at the baseball field. Many a schoolboy was tempted to play "hooky" to hear the broadcast, and some had late marks recorded.

Old man "Depression" was given a laugh this week by a local church congregation. Their harvest festival offerings and donations were the largest in the past seven years of the church's history. There must be a faith that inspires people to give.

Musical Crusaders to Resume Travels

With its network of twenty-six broadcasting stations linking Halifax, Nova Scotia, with Victoria, B.C., the Canadian Pacific Railway gives a very complete coverage of Canadian radio listeners. The programmes planned for the winter season 1931-1932 will consist chiefly of musical travelogues, interpreting the music of various European and Mediterranean countries. Programmes on similar lines were broadcast last winter by the celebrated Ensemble known as the Musical Crusaders, and these

ALFRED HEATHER

brought in so many letters from intending visitors to Europe who desired further information on this subject, and also from new Canadians of European origin settled in Western Canada, that this type of programme has been selected for the coming season as being useful as well as entertaining. This has necessitated a vast amount of research which has been undertaken for the Canadian Pacific Radio department by George M. Brewer, well-known organist and composer of Montreal. Each hour of music includes approximately 20 selections, so that for the series of 18 musical travelogues which has been planned, Mr. Brewer has had to select a total of 360 numbers, each with its special interest and each illustrating some particular phase of the country concerned. These musical travelogues will be interpreted by the Musical Crusaders, under the direction of Alfred Heather, assisted by Rex Battle's Royal York Concert Orchestra, supported by a specially designed studio organ built by J. E. Pepin, of Montreal. There will also be guest artists of various nationalities for certain of the programmes.

This series commences on October 2, with a programme of music from Norway, followed on October 9 by a programme of Danish and Icelandic music. There will be programmes of Spanish, French and German music, and concerts illustrating the music of Sweden, Finland, Italy, Belgium, Austria, Czechoslovakia, Greece, Turkey, Poland, Hungary, Egypt, Scotland and Ireland. Interspersed in these musical travelogues will be other general programmes—for instance, a programme of music rendered by a choir in London, Ontario, on November 20. This series of programmes will be of great educational interest as well as being highly entertaining, and will undoubtedly prove one of the major attractions of the coming season.

Saskatchewan Sodium Sulphate Deposits Are Fast Becoming Of Major Importance To Province

One of the most interesting and important developments of mining in Western Canada recently, says the Manitoba Chamber of Mines, has been the activity in connection with the big sodium sulphate deposits of Saskatchewan. Once looked upon as "alkali sloughs" of no economic value, these Saskatchewan deposits are already becoming of major importance. Shipments in 1930 totalled 31,571 tons valued at \$238,847, compared with 5,018 tons valued at \$44,112 in 1929.

The Horseshoe Lake Mining Company at Ormiston, the principal producers, are shipping their sodium sulphate to the International Nickel Company's plant at Copper Cliff and to the sulphate-pulp mills. The Horseshoe Lake deposit is estimated to contain over 9,000,000 tons. Shipments average almost three cars of sodium sulphate per day; and, in addition, besides other supplies, the operation requires the use of three carloads of coal per day, the coal being used to drive off the moisture content.

In 1929 imports of nitre cake used in nitric refining in Canada amounted to 89,900 tons. It would require 45,000 tons of the natural sodium sulphate from Saskatchewan to manufacture this quantity of nitre cake. In addition, in 1929, salt cake consumed by the pulp and paper mills totalled 44,822 tons. It appears probable, says same authority, that in 1931 much more of the sulphate requirements will be supplied from Saskatchewan deposits.

The development of the "alkali sloughs" of Saskatchewan dates from the time of the war, when there was an exceptional demand for new sources of potash. Investigations conducted on at that time demonstrated that there was an abundance of potash, but some of the investigators pursued the matter further and found that there was an abundance of sodium sulphate. The market for this product has been successfully developed in recent years, and the sales field is increasing. Sodium sulphate was first used as a medicine under the name of Glauber Salts. More recently demand has arisen for it in a number of industries. These include the making of kraft paper, the refining of nickel, the manufacture of window and plate glass, the dye and textile industries, tanning preparations, electro-chemistry and electro-plating and the explosives industry.

Some of the more important deposits of sodium sulphate listed in a review of the situation by the Manitoba Chamber of Mines are the Horseshoe Lake deposit, the Frederic Lake deposit and the Frederic Lake deposit. It is estimated by the Chamber of Mines that there are very large quantities of sodium sulphate available. Deposits lend themselves to ready measurement and those gauged to date total over 100,000,000 tons. Considering the other large number of known, but as yet unmeasured deposits, there is not much question but that Saskatchewan has at least 250,000,000 tons. Many fine individual occurrences running from 10,000 to 4,000,000 tons up to 10,000,000 and 15,000,000 tons are within easy and economic access.

Butter Exports Grow

Heavy Increase In Amount Of Butter Exported Is Shown In Report

That Canada is definitely on an export market basis in so far as butter is concerned is increasingly apparent with each succeeding issue of the market report of the Dominion Dairy and Cold Storage Branch. Exports of butter so far this season, since May 1, total 105,452 packages as compared with 3,068 packages for the corresponding period last year. Also evident is a swing of butter-fat from cheese to butter. Cheese exports last year, May 1 to August 29, 1931 totalled 349,100 boxes, as compared with 374,487 boxes for the same period last year.

The turn of a woman's head often turns a man's head.

"How can you have the nerve to look me in the face?"
"Well, sergeant, one can get used to anything."—Cutler, Madrid.

W. N. U. 1910

Was Once Called "Shaddock"

Captain Of That Name Discovered Grapefruit In Polynesian Islands. Grapefruit, which some "low down" columnist might refer to as a "juicy" topic of discussion, is certainly gaining a place in the world. Shipments of grapefruit to Great Britain and Europe were recently reported to be making strong gains each year, while on this continent it is said to be a strong rival of the orange at breakfast time.

As it happens the grapefruit has no more to do with, or is related to, the grape, than the man in the moon is to Limburger cheese. Its original name was the "shaddock," after it was discovered by George Shaddock in the Polynesian Islands. Because it grows in clusters, and for no other reason, it was forced to get along under its present title. Horticulturists having been trying in vain to rechristen it "pomelo."

Back in 1909, 1,000,189 boxes of the fruit were grown. In 20 years the number increased to 9,218,000 boxes. A native of the East Indies, Florida brought to the West Indies, Florida and California, and has spread to Arizona and Texas. California has 9,000 acres of bearing trees. Arizona has 2,350 acres, Florida has 75,000 acres, while Texas, the State of oil derricks, has 10,192 acres of bearing orchards. Each State has many trees, non-bearing, as yet.

Grapefruit indeed, it might be said, is getting more and more in the public eye!

NEW SLENDERIZING LINES PROVIDE SMARTNESS AND MUCH CHARM

It is a crepe silk print in rich burgundy shade. The neckline is unusually smart, and note the upward pointed treatment of the bodice and hipline seam.

As simple as falling off a log to make it.

Style No. 529 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 38-inch size requires 3 1/2 yards of 38-inch material. Black crepe satin would be just splendid for this model.

Then too, you'll like it in supple woolen.

All patterns 25 cents in stamps or coin (cash preferred). Wrap coin carefully.

Trade Ship From Canada

Will Leave Halifax In January On Trip To West Indies

The West Indies were the first lands sighted by Columbus in 1492. For years writers have made them the scene of tales of piracy and adventure and in more recent times of stories of voodooism and romance.

When, however, the S.S. New Northland, sails from Halifax on January 8, 1932, the passengers will not be going in search of romance or buried treasure, but will endeavour to seek treasure of a more practical kind in the form of increased trade for Canada and more friendly relations between this country and the smaller units of the British Empire which they will visit.

The Canadian Manufacturers' Association, the Canadian-West Indian League and the Clarke Steamship Company are co-operating in organizing the cruise to Bermuda, the British West Indies, British Guiana, the Bahamas and Cuba.

The lounge of the ship will be divided into booths for the exhibition of Canadian manufactured goods and other products of this country. Further space for exhibits will be provided between decks and in the state-rooms.

The cruise will occupy almost two months and between the time of leaving Halifax and the date of return, March 4, 13 ports will have been visited. At none of these ports will the party remain less than one day and at Kingston, Jamaica, the ship will be in the harbour for four days.

In addition to the organizations sponsoring the tour, support is being given the undertaking by Boards of Trade and Chambers of Commerce throughout Canada.

King Crowned Annually

Ceremony Observed Every Year, Before People In Uganda

The native king of Tene, Uganda, was recently crowned. But he is not a new king. The coronation is an annual event. The ceremony takes place on top of King's Hill, where King George Rukidi meets his chiefs and people. The king, who has visited England and been received at Buckingham Palace, is 6 feet tall. The King's coronation robes include a great cowrie shell headgear, with a long, silky-white colobus monkey skin beard attached. On top of his enormous headpiece is placed the actual crown, which is a small red cap. The most impressive part of the ceremony comes when the King walks alone in a small, hut, before which, amid silence, he stands motionless and looks across his country for three minutes. After the ceremony the King changes into a European suit, and the Princess and the Queen Mother receive European visitors, while the King talks in English to his guests and a football match proceeds outside.

The only absolute monarchies are the Empire of Abyssinia, the Kingdom of Siam and the Empire of Morocco.

There are about 7,280 hospitals in the United States. Of these 700 are in New York State.

WILL FILM THE AURORA BOREALIS

Photo - Canadian National Railways

Three explorers and scientists, representing the United States Government, arrive at Churchill. Equipped with motion picture cameras possessing an exceptionally high rate of speed and with films sensitive to all the colors of the spectrum, they will film the Aurora Borealis, as a preliminary to the scientific investigations of Arctic atmospheric phenomena which will be conducted next year by parties sent by all nations interested in Arctic exploration. In charge of the party is Capt. Flavel M. Williams (on steps). His companions are (left) A. Louis, assistant scientist and camera man, and (right) Robert Marshall, coast expert. At Manitoba's ocean port they found an additional interest awaiting them in the loading of the first grain cargoes. They plan to photograph the events of this historic occasion in true colours.

The Present Catatonic

World Is Pleading Through No Ordinary Trade Depression

It is now two years since hard times reached this country, and it is no longer open to serious question that we are in the midst, not of an ordinary trade depression, but of one of the great upheavals and readjustments of modern history. A dozen governments have been brought down by it. In all the five continents it has upset the normal expectations of men by which they have been planting and making, buying and selling, borrowing and lending. In all the vast confusion which has resulted one thing at least is certain—the world, when the readjustments are made, can not and will not be organized as it was two years ago. The post-war era of the Nineteen Twenties is over and done.

As individuals living through this tremendous experience most of us know this with our heads and feel it in our bones. But as a people, in our corporate capacity, we have not yet begun to acknowledge the reality of the change and to formulate our national purposes for dealing with it. As a nation we continue to stand up to the world as we stood two years ago, refusing in any responsible fashion to consider whether the increasing political insecurity of the world (which is reflected in mounting armaments), the increasing obstructions to trade, the desperate complications of debts and reparations, are a probable foundation for the restoration of prosperity. Thus far our national response has been to stand pat in all such matters, and its belief that in six days, ninety days, or six months, the dove would return with the olive branch, the flood would recede, and business would go on as usual. — Walter Lippmann, in the New York Herald-Tribune.

Soldier Settler's Victory

Awarded Alberta Championship For Best Field Of Grain

Peace hath her victories no less renowned than war, as James Hazzlett, of Balmar, near Red Deer, a former Canadian soldier in the Great War, has demonstrated. He has been awarded the championship for the Province of Alberta for this year's best field of standing grain.

The prize-winning field was ten acres of Marquis wheat grown on breaking, and it was first entered in the Field Crop Competition of the Red Deer Agricultural Society, where it won first prize. It is expected to yield 50 bushel to the acre. This year Hazzlett had 777 acres in crop of which 610 acres were won to wheat.

New Glass Is Flexible

A flexible glass has been invented in Europe. It is made largely from vegetable products. It has every appearance of genuine glass and does not look in the least like celluloid, yet it is said a sheet of it can be rolled up as easily as a piece of stiff paper, and it can be dropped or twisted or bent without injury.

"A bachelor has left his fortune to a woman who refused him."
"And then you say we men are not grateful!"

Meat Packing Enjoys Rating As One Of Leading Manufacturing Industries Of The Dominion

Hard Work Not Responsible

Increase In Egg Production Due To Better Hens

"The Canadian Government Information Bureau falls into a regrettable error," declares the New York Times editorial, "when it says that 'hens in Canada are working much harder than they did ten years ago.' It bases this unfortunate declaration on the fact that the average egg production of 6,010 hens in 1920 was 122 1/2 eggs, while in 1930 it rose to 178 eggs for each hen.

"The fact is that the 1930 hens are better bred than the 1920 hens were. The flocks have been improved by persistent, intelligent culling. The hens of non-productive strains have been reduced in number; the good layers have been increased in number. Year after year the breeders have competed for higher marks, and the eggs of their prize-winning and prize-deserving pens have been eagerly sought by poultry men.

"As the better hens became more numerous the number of eggs to the hen rose, but this does not mean that the hens of today work harder than their ancestors did. They merely live up to the superb standard of understanding of the fact that to make a flock profitable its members must lay an average of 150 eggs a year each, and the contemporary Canadian hens, conscious of their responsibilities as key workers in a great and profitable industry, make up their task, knowing not the meaning of the phrase 'hard work.'

Experiment To Be Tried

Province Of Alberta Decides To Attempt Strip Production

"Strip farming" as a means of moisture conservation will be tried out extensively this year on the Alberta Government Farm at Youngstown, according to J. F. Andrew, assistant deputy minister of agriculture.

Alternate strips, ten rods in width, will be seeded and summer-fallowed, and the following year the strips cropped this year will be fallowed. The strips on which the crop is growing draw a considerable amount of water from the resting land; the stubble strips during the winter check soil drifting, and the necessity of keeping the whole field fallowed every second year is avoided.

A special four-year rotation, including corn, sweet clover, summer-fallow and wheat is also being taken as an impetus to mixed farming and live stock production in the so-called dry area of the province.

Will Train Girls

For Domestic Service

Calgary Proposes To Establish School For Unemployed

A domestic training school for unemployed girls will be established here shortly, according to plans announced by the unemployed girls' committee. The proposal is said to have the support of Government authorities and financial aid from both Provincial and Federal relief funds is anticipated.

The committee pointed out that domestic service is almost the only field where girls can still find employment, but many of these who were formerly in stores, offices and factories are without knowledge of cooking and cannot give satisfactory service.

By providing a body of highly-trained girls, the committee believes wide benefits will be realized both by higher earning capacity and in later life, when the girls have homes of their own.

New Glass Is Opaque

Glass that is opaque from the outside recently was demonstrated in the windows and windshield of an automobile. Passengers and driver can see perfectly from the inside of the car, but the appearance from the outside is that of a mirror. The only difference from ordinary glass from the inside is a slight bluish tinge.

Where The Money Is

Who says the people are short of money? At the close of the month of June there were more than \$24,000,000 to the credit of depositors in the Post Office Savings Bank and deposits all but equalled withdrawals during the month in question. Much the same story is related by other savings banks.

Going out to hunt for butter is an ordinary experience in Trinidad, where the natives catch fat young "oil birds" and melt down a supply of butter.

Slaughtering and meat packing is one of the leading manufacturing industries of Canada.

In the list in order of value of production and is preceded by the pulp and paper industry only. On the basis of the value of materials used it comes first in the list. There were 76 plants in the industry in 1929, which was an increase of two over 1928. Production last year, however, was lower than in 1929, which was the record year in the industry since the post-war boom.

The value of production of the slaughtering and meat packing industry in 1930 was \$164,029,953, while the value in 1929 was \$185,842,902. The capital invested in the industry in 1930 amounted to \$60,775,000, of which sum land, buildings and machinery accounted for \$32,788,585, materials, products and supplies on hand for \$15,442,178, and cash and accounts and bills receivable for \$12,538,233.

The number of animals slaughtered in Canadian plants in 1930 was 3,987,819. Of these beavers numbered 627,130, sheep and lambs 758,170, hogs, 2,206,630 and calves, 386,884. The dressed weight of the animals slaughtered amounted to 724,024,410 pounds and the cost value to \$104,815,270. Decreases from the preceding year were shown in the number, weight and value of beaves and hogs slaughtered, while increases were shown in calves. Increases are reported in the number and weight of sheep and lambs slaughtered but there was a decrease in the cost value. Dressed meat purchased by the public in 1930 in a fresh or partly cured state amounted to 70,538,745 pounds valued at \$1,011,881, and the poultry used showed a total of 6,240,959 pounds with a value of \$1,468,593.

The main centre of the slaughtering and meat packing industry in 1930 was in Ontario, where 24 establishments were operating. In the Province of Quebec the number was 17; British Columbia had nine, New Brunswick, eight, Manitoba and Alberta six each, Saskatchewan, three, Prince Edward Island, two, and Nova Scotia, one. The plants generally are of large capacity, only 18 of them in 1930 having a product valued at less than \$100,000. Establishments with a product valued at from \$100,000 to \$250,000 numbered 25, while those with a product valued at \$1,000,000 or over numbered 55.

The consumption per capita of beef and pork in the Dominion in 1930 is reported as being less than in 1929, while there was an increase in the consumption of mutton and lamb. The consumption of beef per capita last year is placed at 67.59 pounds, that of pork at 74.92 pounds, while that of mutton and lamb was 7.11 pounds.

In the previous year the consumption of beef per capita was 68.13, pork 81.52, and mutton and lamb 7.03 pounds.

Silo Saves Surplus Crop

Can Be Kept For Years When Food Is Scarce

A silo on a live stock farm may be helpful as a storage place for immature crops in poor crop seasons and as a storage for surplus crops in good years, according to J. B. Fitch, Kansas State College. Experience has shown that immature crops dried beyond the stage of saving because of the lack of moisture, can be conserved by putting in the silo. In years of surplus roughage, a silo can be justified to hold silage over for lean years.

Frozen Fish Sent Across Canada

The first regular shipments following the experimental shipment of quick frozen fish across Canada recently, comprising seven cars from Prince Rupert, passed through Winnipeg a few days ago over the Canadian National Railway en route to the east for consumption in the United States and Eastern Canada.

"Where is your licence to carry fire-arms?"
"What fire-arms am I carrying?"
"That cigar."—Hummel, Hamburg.

THE HOUSE OF
DREAMS-COME-TRUE

— BY —
MARGARET PEDLER

Author of
"The Splendid Folly," "The Hermit
Of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER II.—Continued.

"It is as an insurance of good health that I come," he informed Jean gravely.

"Oh, yes, we are not here merely for pleasure—comme es autres—"

Madame de Varigny gestured smilingly towards a merry party of men and girls who had just come in from lugging and were stamping the snow from off their feet amid gay little outbursts of chaff and laughter. "We are here just as last year, Peterson."

"The suddenly muted quality of her voice implied just the right amount of sympathetic recollection—"so that mon pauvre mari may assure himself of yet another year of health."

The faintly ironical gleam in her eyes convinced Jean that, as she had shrewdly begun to suspect, the little Count was a "malade imaginaire," and once again she found herself wondering what could be the circumstances responsible for the union of two such dissimilar personalities as the high-bred, hypochondriacal little Count and the rather splendid-looking but almost certainly plebeian-born woman who was his wife.

She intended, later on, to ask her father if he would supply the key to the riddle, but he had contrived to drift off during the course of her conversation with the Varignys', and when at last she found herself free to join him, he had disappeared altogether.

She thought it very probable that he had gone out to watch the progress of a ski-ing match to which he had referred with some enthusiasm earlier in the day, and she smiled a little at the characteristic way in which he had extricated himself from her expense, from the inconvenience of his unexpected rencontre with the Varignys'.

But, two hours later, she realized that once again his superficial air of animation had deceived her. From her window she saw him coming along the frozen track that led from the hillside cemetery, and for a moment she hardly recognized her father in that studiously shrunk, huddled figure of a man, stumbling down the path, his head thrust forward and sunken on his breast.

Her first imperative instinct was to go and meet him. Her whole being ached with the longing to let him feel the warm rush of her sympathy, to assure him that he was not utterly alone. But she checked the impulse, recognizing that he had no use for any sympathy or love which she could give.

She had never really been anything other than exterior to his life, outside his happiness, and now she felt intuitively that he would wish her to remain equally outside the temple of his grief.

CORN
LIFT OFF

Pain
Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful! It is just what you need. Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any drugstore for 35c.

PUTNAM'S

W. N. U. 1910

He was the type of man who would bitterly resent the knowledge that any eyes had seen him at a moment of such utter, pitiable self-revelation, and it was the measure of her understanding that Jean waited quietly till he should choose to come to her.

When he came, he had more or less regained his customary poise, though he still looked strained and shaken. He addressed her abruptly.

"I've decided to go straight on to Montreal and sail by the next boat. Jean, there's one I can catch if I start at once."

"At once?" she exclaimed, taken aback. "You don't mean—today?"

He nodded.

"Yes, this very evening. I find I can get down to Montreal in time for the night mail. Then, answering her unspoken thought: "You'll be quite all right. You will be certain to hear from Lady Anne in a day or two, and, meanwhile, I'll ask Madame de Varigny to play chess for me."

She was delighted—"with a flash of the ironical humour that was never long absent from him."

Who was she before she married the Count?"

"I can't tell you. She is very reticent about her antecedents—probably with good reason—smiling grimly. "But she is a big and beautiful person, and our little Count is obviously quite happy in his choice."

"She is rather fascinating, woman," commented Jean.

"Yes—but preferable as a friend rather than an enemy. I don't know anything about her, but I wouldn't mind wagering that she has a dash of Corsica about her. In any case, she will look after you all right till Anne Brennan writes."

"And if no letter comes?" suggested Jean. "Or supposing Lady Anne can't have met? We're rather taking of Corsica, aren't we?"

His face clouded, but cleared again almost instantly.

"She will have you. Anne would never refuse a request of mine. If not, you must come on to me, and I'll make other arrangements,"—vaguely.

"I'll let the next boat go, and stay in Paris till I hear from you. But I can't wait here any longer."

He paused, then broke out hurriedly:

"I ought never to have come to this place. It's haunted. I know you'll be conscious of a shivering fear of that mysterious force called love, which can make, and so swiftly, terribly unmake, the lives of men and women."

CHAPTER III.

The Stranger On the Ice

"And this friend of your father's?"

"You have not heard from her yet?"

Jean and Madame de Varigny were breakfasting together the morning after Peterson's departure.

"No. I hoped a letter might have come for me by this morning's post. But I'm afraid I shall be on your hands a day or two longer"—smiling.

Jean and Madame de Varigny looked at each other. "Madame de Varigny reassured her warmly. "My husband and I are here for another week yet. After that we go on to St. Moritz. He is suddenly discontented with Montevideo. If, by any chance, you have not heard from Lady—Lady—"

"I forgot the name."

"Lady Anne Brennan," supplied Jean.

A curiously concentrated expression seemed to flit for an instant across Madame de Varigny's face, but she continued smoothly:

"Mais, oui—Lady Brennan. 'Eh bien,' if you have not heard from her by the time we leave for St. Moritz, you must come with us. It would add greatly to our pleasure."

"It's very good of you," replied Jean. She felt frankly grateful for the suggestion, realizing that if, by any mischance, the letter should be delayed till then, Madame de Varigny's offer would considerably smooth her path. In spite of Glyn's decision that she must join him in Paris, should Lady Anne's invitation fail to materialize, she was well aware that he would not greet her appearance on the scene with any enthusiasm.

"I suppose"—the Countess was speaking again—"I suppose Brennan is a very frequent—a common name in England?"

The question was put casually, more as though for the sake of making conversation than anything else. Yet Madame de Varigny seemed to await the answer with a curious anxiety.

"Oh, no," Jean replied readily enough. "I don't think it is a common name. Lady Anne married into a junior branch of the family, I believe," she added.

"That would not be considered a very good match for a peer's daughter, surely?" hazarded the Countess. "A junior branch? I suppose there

was a romantic love-affair of some kind behind it?"

"It was Lady Anne's second marriage. Her first husband was a Tor-martin—one of the oldest families in England." Jean spoke rather stiffly. There was something jarring about the perfunctory catchword.

Madame de Varigny's lips trembled as she put her next question, and not even the dusky frown of lashes could quite soften the sudden tense gleam in her eyes.

"Tor-ma-rin?" She pronounced the name with a French inflection, evidently finding the unusual English word a little beyond her powers.

"What a curious name! That, I am sure, must be uncommon. And this Lady Anne—she has children—sons?"

"No."

"Oh, yes. She has two sons."

"Indeed?" Madame de Varigny looked interested. "And what are the sons called?"

Jean regarded her with mild surprise. Apparently the subject of nomenclature had a peculiar fascination for her.

"I really forget. My father did once tell me, but I don't recollect what he said."

A perceptible shade of disappointment passed over the other's face, then, as though realizing that she had exhibited a rather uncalled-for curiosity, she said deprecatingly:

(To Be Continued.)

Strength Of Yellow
Race Is Increasing

Chinese May Eventually Cover Earth
Say British Scientists

Scientists of the British Association for the Advancement of Science spoke warning words of the growing strength of the yellow races.

Professor F. A. Crew of Edinburgh, Scotland, said the Chinese were swarming and conquering in peaceful migration, vast regions in the Pacific.

"This migration," Professor Crew said, "is an event which surpasses in importance all the civil wars now being prosecuted in China, for we are being given evidence that of all human stocks the Chinese are perhaps most adaptable."

"They seem to breed and develop normally anywhere and everywhere. If this is the case then indeed the Chinese will inherit the earth."

Professor Julian Huxley, distinguished biologist, described birth control as a new phenomenon of the first magnitude which was likely to affect all countries in the coming century.

The result, even in countries where over-population threatened, in the next 100 years would probably bring danger of depopulation, he declared.

Professor A. M. Carr-Saunders of Liverpool said the population of the world had increased four-fold in 300 years. He predicted the races of European descent would stop increasing within three generations.

The Crisis In Britain

The Causes Leading Up To The
Financial Debacle

Let no man think that one step will take us out of the wood, or that by one bound we can reach the upper air after our plunge down the easy descent to Avernus. The causes go far back and they will not be rooted out by digging on the surface only. They go back to the War, to the years of destruction and consumption; of production not of wealth but of weapons of no worth today; to the incurring of our war debts and their results, one of which is the storing of gold in a country which refuses to take goods in payment of debt; to the effect of this on the world's trade, when prices fall and fall, in part because producers long to sell their commodities at any price in a market that refuses to buy them. Nearer home are causes by which we ought to have controlled consuming more than we produced, what is called living above our income.—London Spectator.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Ship Tomatoes To Hong Kong
With a view to popularizing British Columbia fruit in the Orient, a trial shipment of canned tomatoes, grown in the province, left on the S.S. Empress of Asia for Hong Kong and Shanghai recently, the same liner carrying, also, a cargo of canned loganberries for Hong Kong.

Egg Exports Higher

British Market For Canadian Product
Better Than Last Year

The financial situation in Great Britain is not expected to have any immediate effect on export of eggs from Canada.

The bulk of the contracts for exports of eggs to Britain are completed by this time of the year, states a weekly report of the Department of Agriculture, with practically all sales on a basis of Canadian currency.

In recent years export of eggs to Great Britain have been declining steadily, due to increased consumption in Canada, but the current year has, witnessed some revival which promises to be substantially above 1930.

Soviet Matches

The Brandon Sun Says it would be interesting to know just how Russian products can enter Canada in the face of the ordinary customs and inspections. There should be some method of protecting Canadian industries from soviet competition. Nevertheless matches made in Russia and marked with the soviet brand can easily be purchased in Brandon. They are on sale in Brandon. There are several match factories in Canada.

Rural electric power lines can be run underground cheaper than they can be strung on poles, a recent analysis of costs has shown.

Find Prehistoric Remains

Skeleton Of Man Of Giant Proportions
Unearthed In British Columbia

Rhologists and archaeologists in British Columbia are intensely interested in the discovery, by a road gang, of a group of skeletons near Vernon. It is believed that they may be the remains of a race that preceded the native races that met the first coming of the white men of the interior valleys 120 years ago.

The particular skeleton that is causing speculation is that of a man. It measures six and one-half feet, but the man, in life, would have measured at least one inch or possibly two inches more. The skull formation is much larger and of different shape to those discovered in other excavations in the district.

The find was made by a road gang at work on the Vernon-Kamloops Highway, about four miles out of the former place. Six skeletons were uncovered. One was that of a woman, another of a child, and a third of a young man possibly 19 years of age. The fourth was a skeleton of a man of giant proportions.

In close association with the human remains were found stone implements, differing a little from the type of implements used by natives on the arrival of the white man. This, however, does not give any indication as to the period at which the aborigines lived as there is practically no difference known to exist that definitely marks phases of the Stone Age west of the Rockies.

Among modern Indians there are legends of the existence of a race of giants who inhabited the country before the coming of the peoples of Mongolian extraction.

THE RHYMING
OPTIMIST

By Aline Michells

THE CHALLENGER

At last there dawns a day when strength drifts out.

When every energy and impulse wane,
When high desire is gone and creeping doubt
Brings futile fears and shadows in its train.

Then rises in man's soul to meet that hour
A force surpassing any he has known.
A calm security, a certain power
Not to be turned aside or overthrown.

This is its part; to nerve his outstretched hand
Until it grasps, unflinching, the cup
Life offers him; defying, to withstand
The menace of the portion he must sup.

Supreme despite defeat, man then must be
Himself a challenge to Divinity!

Not Peculiar To London
Well-To-Do People Taking Jobs Away
From Needy Ones

We are interested in reading that "the Hon. Phyllis Astor, only daughter of Viscount and Viscountess Astor, is one of the latest recruits to the business world." She has taken a job—or possibly it is a position—in a London west end real estate office.

It may be assumed that the Hon. Phyllis is a capable young woman who will be able to make herself of use in the office referred to and that her services will be of value to the concern hiring her. One might indulge here in a few of those standard observations about the nobility of work, the waste and wickedness of idleness and all that sort of thing.

But we can't get away from the thought that there must be a lot of girls in London who need that job whenever they shall choose to retire into itself. For nowhere either with more quiet or more freedom from trouble does a man retire than into his own soul, particularly when he has within him such thoughts that by looking into them he is immediately in perfect tranquillity.

—Matthew Arnold.

Men seek retreats, houses in the country, seashores and mountains; and thou too art wont to desire such things very much. But this is altogether a mark of the most common sort of men, for it is in thy power whenever thou shalt choose to retire into thyself. For nowhere either with more quiet or more freedom from trouble does a man retire than into his own soul, particularly when he has within him such thoughts that by looking into them he is immediately in perfect tranquillity.

—Marcus Aurelius.

What's In A Name

When Well Established It Means Much To A Paper

When the London Sunday News stopped publication a couple of weeks ago, not even the members of its staff knew that this was about to happen. The paper had formerly been Lloyd's Weekly News, a great popular favourite and the first newspaper in England to reach the million in circulation. It was at the top of its popularity when it was purchased by a new company, and Frank Lloyd stipulated that after a certain period the family name should be dropped from its title. The purchaser agreed to this, not knowing the supreme importance of an established name in a case like that. The readers of Lloyd's could not find it on the news stands. They did not know the Sunday News from a dozen others. By changing its name the paper went down and out.

May Scrap the Battleship

Britain Scrup Disarmament Proposal To United States

In anticipation of the Geneva disarmament conference next winter, British statesmen have renewed their suggestion that the United States join with them in abolition of the battleship, it is learned.

British statesmen say the battleship has lost its major usefulness; that it is the greatest source of expense in naval budgets, and the best place at which to effect large economies at one stroke.

An efficacious household remedy—Douglas' Egyptian Liniment. Brings immediate relief to lame back and muscular rheumatism. Also relieves inflammation, burns, sores, corns and warts.

Canada's Wool Clip Inadequate

Canada's total wool clip is about 21,000,000 pounds annually while Canadian mills use at least twice as much as this every year and Canadian consumption of manufactured woollens equals about four times the clip.

It has a wingspread of only 45 feet and is driven by a 28 horsepower motor. It's sponsors claim it has shown such remarkable flying qualities that it may prove to be a turning-point in aeroplane construction.

The pen is mightier than the sword and not as expensive.

Has Strange Hobby

London Man Has Read Old Testament Fifty-Seven Times

There is a man in England who has made a hobby of reading the Bible. He has read the whole of the Old Testament fifty-seven times and the New Testament 114 times—all in fifty-seven years. He is Mr. Frank Jannaway of Stockwell Park Road, London.

He reads portions of the Bible for fifteen or twenty minutes three times a day, and by this means it is possible in a year, to read the Old Testament once and the New Testament twice.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

New Plane Has No Tail

Designed By German Aviator Has Remarkable Flying Qualities

An airplane without a tail, designed by Captain Hermann Koehl, trans-Atlantic flyer, has been demonstrated before representatives of the ministry of transportation.

It has a wingspread of only 45 feet and is driven by a 28 horsepower motor. It's sponsors claim it has shown such remarkable flying qualities that it may prove to be a turning-point in aeroplane construction.

The pen is mightier than the sword and not as expensive.

NEURALGIA

The agonizing aches from neuralgia can be quieted in the same way you would end a headache. Take some Aspirin tablets. Take enough to bring complete relief. Aspirin can't hurt anybody.

Men and women bent with rheumatism will find the same wonderful comfort in these tablets. They aren't just for headaches or colds! Read the proven directions covering a dozen other uses; neuritis, sciatica, lumbago; muscular pains.

Cold, damp days which penetrate to the very bones have lost their terror for those who carry Aspirin tablets with them. All drug stores, in the familiar little box:

Tablets Aspirin

Personal and Local

Mrs. Weaver, of Blairmore, is visiting her brother at Portland, Oregon, for three weeks.

Mr. Poole says the gum drops he sells are so good they will stay with you till the last drop.

Aileen Apponen is taking a course in hairdressing and beauty parlor technique at Calgary.

James Park of Coleman Cash Grocery was a Calgary visitor during last week.

Inspector Scott, in charge of Lethbridge district Alberta Provincial Police, was on a tour of the Pass towns last Friday.

"Irish Conetti" is the name in police circles for bricks and other missiles used by the Reds in their attacks.

There will be a business meeting of the A. Y. P. A. in St. Alban's parish hall on Friday, at 8 p. m. sharp.

Mrs. J. Morgan and little daughter of Pincher Creek were recent visitors with Mr. and Mrs. Wm. Haysom.

Sacks of flour and potatoes will be given as prizes at the Caledonian Society whist drive and dance on Friday evening in the K. of P. hall.

Frank Barringham has developed a literary turn of mind. He has written the manuscript of a story based on his early experiences in the district.

Giant pumpkins 70 lbs. weight have been on view in the Palm Confectionery during the week. They were grown on Mr. F. Celli's fruit ranch at Creston.

The following indicates the strong homing instinct of pigeons. Charlie Makin sent four pigeons to a friend at Saunders, over 200 miles north of Coleman, and one of them returned to its home loft. The birds had never previously been taken in that direction.

Sam Moores, who was a recent visitor to Creston, states that many growers have apples which are left to rot on the ground, which seems a crime in view of the fact that so many would be glad to have them if arrangements could be made for shipping.

Mr. and Mrs. John Watson of Fan 98 left last week on a visit to Nelson and vicinity. It is reported they are contemplating a move. They have lived at the fan house for several years, and their home was a favorite calling place for many who strolled up the road to York Creek. The children especially were always interested in Polly, the parrot.

The "gloomy Gus" type of person may revel to his heart's content these days, digging a hole of depression so deep that he will be lost sight of should he fall in. No regrets will be expressed. On the other hand it is a pleasure to meet men who are working cheerfully and feeling pleased that they are riding the waves.

Monday is Thanksgiving Day

At the last session of Parliament it was decided to move Thanksgiving Day forward to a date in October, as was the custom until a few years ago, and observe Nov. 11 in each year as "Remembrance Day." This has been celebrated heretofore as Armistice Day in conjunction with Thanksgiving, the joint holiday always being observed on the Monday of the week in which November 11 fell. Under the new legislation both days will be observed as public holidays. Thanksgiving has been proclaimed for October 12 and Remembrance Day will fall on Wednesday, Nov. 11. Both will be school holidays.

As a measure of economy the usual district conventions of teachers will not be held this year. School authorities and teachers reading this notice are asked to give it as wide publicity as possible that no confusion may result.

"Hear, Hear!" in Two Places

The Blairmore Enterprise and the Coleman Journal are read by the Reds to belong to the capitalist press. We'd both like to see the capital.—Enterprise.

World's Series Sweepstakes

Tickets were drawn as follows:

BREAD!

He's for it first, last and all the time.

He's a Canadian boy.

He loves plain, wholesome things.

He loves Bread, the great Canadian food.

It contains double the amount of nourishment you find in other foods.

It's your Best Food—Eat more of it.

Your boy will like the delicious wholesome slices of

Mother's Bread
